

UNIVERSAL INDUSTRIES

Field Tank & Facility Fabrication

Universal has been a leader in field fabrication for over 50 years, with the capability to fabricate field erected tanks of any size. Universal has been involved in many major projects throughout domestic & international markets.

With an experienced engineering, technical and production staff, Universal has the unique ability to offer our customers "Turn-Key" production facilities including water treatment, oil treating and specialty designs to suit the customer's needs.

Our crews have the required safety training and tickets to ensure that all work performed on our customers sites is done with personal safety and the customers facilities as the first consideration.

Universal currently has API 653 credited inspectors on staff and engineers qualified in tank design to meet your needs and provide repairs that adhere to current regulations.

Several options are available including:

- Self supporting cone roofs
- Self supporting dome roofs
- Internal and external floating roofs
- Cone bottoms
- Internal and external coatings and insulation in accordance with industry standards
- Skim tank support and construction expertise
- De-sanding systems
- High Efficiency Low Emission (HELEx®) burner system
